Instructions for usage

Apply the stamp remover to the stamp direct or to the back of the paper on which the stamp is attached (i.e. envelopes, postcards etc) by painting the area with the aid of the brush provided. Leave the stamp remover for 1-2 minutes and then gently peel off the stamp.

With more difficult cases the process should be repeated or apply the solution to both sides of the stamp. The gum and other details on the back of the stamp are retained. Place the stamp picture side down to dry out and if necessary it can be pressed once it is completely dry.

No damage will occur to the stamps if the instructions are followed carefully.
